price at 31 Jul 2022

0.860%

ongoing charge

August 2022 (data as of 31 July 2022)

OBJECTIVE AND INVESTMENT POLICY

Objective

To grow capital over a five year period.

Investment policy

What the fund invests in

- 80% to 100% in company shares.
- Up to 20% in bonds, cash and nearcash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.

Use of derivatives

The fund may use derivatives for efficient portfolio management purposes to:

- reduce risk
- manage the fund efficiently.

Where the fund invests

- At least 80% in the United Kingdom.
- Up to 20% in other countries.

Industries the fund invests in

- Any

Other limitations specific to this fund

- None

Investment strategy

- The fund is actively managed.
- A proprietary tool called 'SmartGARP' is used as the foundation of the investment process. It screens the financial characteristics of companies by identifying those that are growing faster than the market but are trading on lower valuations than the market.
- The manager selects companies that in aggregate have good 'SmartGARP' characteristics. This tends to mean that the portfolio contains stocks that have lower valuations than the market average, upgrades to profit forecasts, and are under-owned by the investment community, while at the same time benefiting from helpful trends in the wider economy.

Benchmarks

- FTSE All-Share Index TR
A widely-used indicator of the performance of the UK stockmarket, in which the fund invests. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.
- IA UK All Companies NR
A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

RISK CONSIDERATIONS

To ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus, from www.artemisfunds.com or www.fundinfo.com.

The fund is exposed to the following risks:

Market volatility risk	The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
Currency risk	The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.

OTHER INFORMATION

This is a marketing communication. Before making any final investment decisions and to ensure you understand whether this fund is suitable for you, please read the Key Investor Information which is available, along with the fund's Prospectus from www.artemisfunds.com or www.fundinfo.com.

Investment in the fund concerns the acquisition of units in the fund and not in the underlying assets of the fund.

The fund is an authorised unit trust scheme. For further information, visit www.artemisfunds.com/unittrusts.

Visit www.artemisfunds.com/glossary for an explanation of investment terms.

Third parties (including FTSE and Morningstar) whose data may be included in this document do not accept any liability for errors or omissions. For information, visit www.artemisfunds.com/third-party-data.

Artemis has obtained any research and analysis in this communication for its own use. Although this communication is based on sources of information that Artemis believes to be reliable, no guarantee is given as to its accuracy or completeness.

Any forward-looking statements are based on Artemis' current expectations and projections and are subject to change without notice.

SEDOL	B2PLJM6
ISIN	GB00B2PLJM64
Fund launch date	23 December 1986
Artemis became manager	9 September 2002
Class launch date	1 September 2010
Class launch price	720.2p
Class currency	GBP
Valuation point	12:00
Year end	7 April
Accumulation date	7 June
Fund size	£312.3m

Source: Artemis as at 31 July 2022.

PRICE AND YIELD

Price	2196.30p
Historic yield	3.96%

Source: Artemis as at 31 July 2022. The historic yield reflects distributions declared over the past 12 months as a percentage of the price. Investors may be subject to tax on their distributions.

CHARGES

Initial charge	0%
Ongoing charge	0.860%

The ongoing charge covers the annual operating expenses of running the fund and is shown as at the date of the Key Investor Information Document, where further information about the fund's charges can be found. Additional costs may be incurred, such as portfolio transaction costs and transfer taxes, which may reduce performance.

RISK AND REWARD PROFILE

The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.

HSBC Index Tracker Investment Funds

FTSE 250 Index Fund

Monthly report 31 July 2022 | Share class Acc C

Investment objective

The Fund aims to track the performance of the FTSE 250 Index (the "Index") before the deduction of charges and tax.

Investment strategy

The Fund will invest directly in shares (equities) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index. However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund's performance is measured against the Index, because the Fund intends to track the performance of the Index. The Index is made up of the 250 largest companies after the 100 largest stock market listed companies in the United Kingdom, as defined by the Index Provider.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").

Risk disclosures

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Further information on the potential risks can be found in the Key Investor Information Document (KID) and/or the Prospectus or Offering Memorandum.

Glossary

Invesco Asian Fund (UK)

August 2022

Covering the month of July 2022

Fund manager: William Lam

Key facts¹

William Lam	
Managed fund since	April 2015
Industry experience	21 years
Based in	Henley -on- Thames
Fund launch date	10 February 1990
Fund size	£1,977.92m
Legal status	UK authorised ICVC
Yield (Z Accumulation share class)	
Historic yield ²	1.49%
Income distribution date(s)	31 January
Accounting period ends	31 May 30 November
Available with an ISA?	Yes

Benchmark

Benchmark: Investment Association Asia Pacific excluding Japan Sector*

This is a Comparator Benchmark. Given its geographic focus the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

* Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics.

Fund investment objective and policy

The objective of the Fund is to achieve long-term (5 years plus) capital growth. The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in Asia and Australasia, excluding Japan. The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.

Fund strategy

We seek to invest in companies whose share prices are substantially below our estimate of fair value. Our search for undervaluation leads us to look for new ideas in unloved areas of the market. At the same time we have a clear preference for cash-generative companies with strong balance sheets, as these attributes suggest sustainable business models and conservative management.

Five year performance

Performance

	1 year	3 years	5 years	5 years ACR*	10 years	10 years ACR*
Fund (Z Accumulation share class)	5.21	23.85	32.60	5.80	185.47	11.05
Benchmark	-4.61	12.43	27.11	4.91	122.40	8.32

*ACR - Annual Compound Return

Standardised rolling 12-month performance

	30.06.17	30.06.18	30.06.19	30.06.20	30.06.21	30.06.22
Fund (Z Accumulation share class)	7.37	1.99	0.35	28.68	-0.26	-10.18
Benchmark	7.38	4.99	2.35	26.20	-10.18	-10.18

Past performance is not a guide to future returns. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the accumulation share class, without any adjustment for fees. Performance figures for all share classes can be found in the relevant Key Investor Information Document. Fund performance figures are shown in sterling, inclusive of reinvested income and net of the ongoing charge and portfolio transaction costs to 31 July 2022 unless otherwise stated. Sector average performance is calculated on an equivalent basis. The standardised past performance information is updated on a quarterly basis. Source: Lipper.

Investment risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.
- The fund invests in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.
- The Fund may use Stock Connect to access China A Shares traded in mainland China. This may result in additional liquidity risk and operational risks including settlement and default risks, regulatory risk and system failure risk.
- The fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the fund. The Manager, however, will ensure that the use of derivatives within the fund does not materially alter the overall risk profile of the fund.

Important information

- ¹ All fund portfolio figures within this leaflet are as at 31 July 2022 (source: Invesco).
- ² The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market price of the fund, as at the date shown. Investors may be subject to tax on their distributions.

Where individuals or the business have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice. This document is marketing material and is not intended as a recommendation to invest in any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication.

For the most up to date information on our funds, please refer to the relevant fund and share class specific Key Investor Information Documents, the Supplementary Information Document, the ICVC ISA Terms and Conditions, the Annual or Interim Reports and the Prospectus, which are available using the contact details shown.

Who is this fund for?

The fund might be right for you if you:

- Are a private or professional investor looking for growth over the long term.
- Are able to make an informed investment decision based on this document and the Key Investor Information Document (KIID).
- Are willing to accept that your capital is at risk and you may not get back the amount invested.

The fund will not be right for you if you:

- Require capital protection or have no appetite for risk.

Man GLG Japan CoreAlpha Fund

MONTHLY SUMMARY REPORT: 29 APRIL 2022

REPORTING CLASS: Man GLG Japan CoreAlpha Fund Professional Acc C

FUND DESCRIPTION

The Fund seeks to provide capital growth by outperforming each of (i) TOPIX Total Return Index (GBP) ("TOPIX") and (ii) Russell/Nomura Large Cap Value Total Return Index ("RNLCV"), both converted to sterling, in a market cycle of five years. The Fund will invest at least 80% of its assets in (i) equities of Japanese companies; or (ii) companies which derive a substantial part of their revenues from activities in Japan. The Investment Manager's investment process focuses on selecting stocks which it considers to be undervalued based on their Price to Book ratio (which compares a company's share price with the accounting value of its assets ("PBR")) relative to TOPIX). The Fund has a "Value" bias, as opposed to funds which have a "Growth" bias (i.e. invest in companies with high PBRs).

A complete description of fund aims is set out in the fund's prospectus.

FUND RISKS

The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested. Prior to investing in the Fund investors should carefully consider the risks associated with investing, whether the Fund suits their investment requirements and whether they have sufficient resources to bear any losses which may result from an investment in the Fund. Investors should only invest if they understand the terms on which the Fund is offered. Investors should consider the following risks and where appropriate seek professional advice before investing: **Investment Objective Risk, Market Risk, Counterparty Risk, Currency Risk, Liquidity Risk, Financial Derivatives Instruments, Single Region/Country Risk.** More details can be found in the risk glossary. **Prior to making investments investors should read and consider the fund's offering documents.**

† The Fund was authorised as an OEIC in May 2004. A new management team and a new strategy were introduced in January 2006; the start of the Japan CoreAlpha Strategy. The inception dates in the cumulative performance and performance statistics tables are from the start of the strategy.

TOPIX Total Return and the Russell/Nomura Large Cap Value Total Return are considered target, comparator and constraining benchmarks. The Authorised Corporate Director considers them a reasonable performance target for the Fund to achieve, taking into account the investment strategy pursued by the Investment Adviser and the assets in which the Fund will principally invest. They are used for investment purposes, which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund. Both indices are also comparator benchmarks, as they provide an appropriate comparison for performance purposes given the Fund's investment objective and policy. In addition, the Investment Association's Japan sector is also a comparator benchmark.

GLOSSARY

Active Share	Active share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the reference index.
Annualised Return	An annualised total return is an average amount of money earned by an investment each year over a given time period. It is calculated to show what an investor would earn over a period of time if the annual return was compounded.
Annualised Volatility	Volatility is the rate and extent at which the price of a portfolio, security or index, moves up and down. If the price swings up and down with large movements, it has high volatility. If the price moves more slowly and to a lesser extent, it has lower volatility. It is used as a measure of the riskiness of an investment. Annualised volatility is an average annual amount of volatility over a given time period.
Beta	A measure of how sensitive an investment portfolio is to market movements. The sign of the beta (+/-) indicates whether, on average, the portfolio's returns move in line with (+), or in the opposite direction (-), to the market. The market has a beta of 1. If the portfolio has a beta of less (more) than 1, it means that the security is theoretically less (more) volatile than the market.
Comparator Benchmark	An index or similar factor against which a fund manager invites investors to compare a fund's performance.
Constraining Benchmark	An index or similar factor that fund managers use to limit or constrain how they construct a fund's portfolio. By the default this is also a comparator benchmark.
Correlation	A measure of the interdependence or strength of the relationship between two investments. A correlation of 1 means that the two investments are perfectly synchronised, -1 implies that they move in symmetrically opposite directions and 0 means no relationship between them.
Distribution Yield	The distribution yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the fund's net asset value per share as at the date shown, and may be estimated. It does not include any initial charge and investors may be subject to tax on distributions.
Entry Charge	The entry charge shown is a maximum figure and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.
Exposure	This refers to the part of a portfolio that is subject to the price movements of a specific security, sector, market or economic variable. It is typically expressed as a percentage of the total portfolio, e.g. the portfolio has 10% exposure to the mining sector.
Information Ratio	A ratio of portfolio returns above the excess returns of a benchmark (usually an index) to the volatility of those returns. The ratio measures a portfolio manager's ability to generate excess returns relative to a benchmark. Volatility is measured using tracking error.
Market Cap	The market value of a company's outstanding shares. The micro dollar market capitalisation is from 0 to \$500m, the small dollar market capitalisation is from \$500m to \$2.5bn, the mid dollar market capitalisation is from \$2.5bn to \$5bn, the large dollar market capitalisation is from \$5bn to \$12.5bn and the mega dollar market capitalisation is \$12.5bn and above.
NAV	The Net Asset Value (NAV) represents the value per share. It is calculated by dividing the total net asset value of the fund (the value of the fund's assets less its liabilities) by the number of shares outstanding.
Ongoing Charge Figure (OCF)	The OCF is estimated and based on expenses and may vary from year to year. It includes management fees but excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund. The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
Overweight/Underweight	Refers to a fund's position in line with its chosen reference index. Overweight means a fund holds more of a certain security than the reference index and underweight means a fund holds less of a certain security compared to its reference index.
Performance Fee	The payment made to an Investment Manager if certain performance levels are achieved (often over and above any levels set out in the investment objective) within a set time period. Please refer to the fund's prospectus for a complete description.
Position Concentration	The proportion of a portfolio's net asset value represented by the largest (e.g. 5/10/20) positions.
Quartile Ranking	Quartile rankings are a measure of how well a fund has performed against a group of similarly categorised funds. The rankings range from 1 to 4, with 1 representing the fund's performance being in the top 25% of funds in its sector.
Redemption Fee	This is the maximum amount by which your investment may be reduced prior to the proceeds being paid out.
Sector (i)	A sector is an area of the economy in which businesses share the same or a related product or service. It can also be thought of as an industry or market that shares common operating characteristics. Dividing an economy into different pieces allows for more in-depth analysis of the economy as a whole.
Sector (ii)	A peer group of funds which have a similar investment objective or invest in the same type of assets. These are organised by independent companies such as the Investment Association in the UK. The average performance of a sector is often used to compare with the performance of an individual fund in the sector.
Sharpe Ratio	The Sharpe Ratio is a measure for calculating risk-adjusted return, and has become the industry standard for such calculations. The Sharpe Ratio is the average return earned in excess of the risk-free rate per unit of volatility or total risk. The higher the ratio the better, with a number greater than 1 usually considered good, a number greater than 2 considered very good and a ratio of 3 or higher considered excellent. As it is an absolute measure of risk-adjusted return, negative Sharpe Ratios can be misleading and are therefore shown as N/A.
Synthetic Risk & Reward Indicator (SRRI)	Featured on the Key Investor Information Document (KIID), the SRRI is a measure of the overall risk and reward profile of a fund. Funds are categorised on a scale from 1 to 7 where 1 is the lowest risk and 7 is the highest. Typically, the SRRI is derived from the volatility of past returns over a 5-year period. Investors should be aware the indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.
Target Benchmark	An index or similar factor that is part of a target a fund manager has set for a fund's performance to match or exceed (including anything used for performance fee calculation). By default this is also a comparator.
Tracking Error	Tracking error is a measure of the divergence between a portfolio's returns and the benchmark or index against which it is managed.
YTD	Year-to-date.

RISK GLOSSARY

Investment Objective Risk	- There is no guarantee that the Fund will achieve its investment objective.
Market Risk	- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets. Therefore, the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
Counterparty Risk	- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.
Currency Risk	- The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
Liquidity Risk	- The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.
Financial Derivatives Instruments	- The Fund may invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) typically for hedging purposes. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is

Man GLG Japan CoreAlpha Fund

based. The use of FDI may multiply the gains or losses.

Single Region/Country Risk - The Fund is a specialist country-specific or geographic regional fund, the investment carries greater risk than a more internationally diversified portfolio.

A complete description of risks is set out in the Fund's prospectus.

Important information

This material is of a promotional nature.

The Fund is a sub-fund of Man International ICVC, domiciled in the United Kingdom and registered with the Financial Conduct Authority. Full details of the Fund objectives, investment policy and risks are located in the Prospectus which is available with the Key Investor Information Document (KIID) and the Report and Accounts of the UK UCITS in English. The Fund's documentation is available free of charge from the local information/paying agent, from authorised distributors and from www.man.com/documents.

In order to fulfil the fund's objectives the Prospectus allows the manager the ability to invest principally in units of other collective investment schemes, bank deposits, derivatives contracts designed with the aim of gaining short term exposure to an underlying stock or index at a lower cost than owning the asset, or assets aiming to replicate a stock or debt securities index.

The Fund typically carries a risk of high volatility.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

This material is for information purposes only and does not constitute an offer or invitation to invest in any product for which any Man Group plc affiliate provides investment advisory or any other services. It is not contractually binding nor does it represent any information required by any legislative provision. Prior to making any investment decisions, investors should read and consider the fund's offering documents.
